"NBC" Weapons : ipso facto a crime against humanity

"NBC" means Nuclear, Biological, and Chemical (weapons).

These are ipso facto a crime against humanity because they address populations generally and cannot be controlled so as to affect only a military target.

War is born of greed and the Lust for Power. These sins are born for the want of Grace.

The history of man is blackened with the stories of war. The only known Rx for this may be found in Education, Free Communications, and a respect for placing limits upon the power of government.

At this time we should all reflect on our experience with the COVID-2 outbreak. What if a military weapon just as contagious as COVID-2 were released?

We need open information here so that we can stop any development of biological weapons.

a prayer is warranted as well: hopefully: it's not too late.
